## Summary

---

I am a Computer Science undergraduate skilled in **Python**, **SQL**, and machine learning, with experience in data driven projects and **ML model development**. Strong problem solving abilities backed by competitive programming experience.

## Skills

---

**Languages:** • Python

**Data Analysis:** • Pandas • NumPy • Seaborn • Matplotlib • Scikit-learn • LightGBM

**DataBases:** • MySQL

**Concepts:** • Data Cleaning • Feature Engineering • Statistical Analysis • Hypothesis Testing • EDA • Data Storytelling • Business Insights

**CS Fundamentals:** • DSA • OOPS • DBMS • OS

**Others:** Langchain • HuggingFace

## Projects

---

### Internest | Internship Recommendation System

**Tech:** • Python • Pandas • LightGBM • Seaborn • Scikit-learn

- Collected and cleaned 5k+ internship records; performed data preprocessing, outlier handling, and feature engineering.
- Conducted exploratory data analysis to uncover trends in stipend, duration, and domain preferences.
- Built and evaluated LightGBM model using Accuracy, AUC, Precision, Recall, and F1-Score metrics.
- Delivered top recommendations through JSON export and interactive filtering by sector & location.

### The HealthGuy | AI Assisted Medical Information Analyzer

**Tech:** • Python • LangChain • HuggingFace • Chainlit

- Utilized large medical encyclopedia dataset; performed data extraction, text cleaning, and summary analytics.
- Built data pipeline to evaluate user query patterns and generate contextual insights with 90 %+ accuracy.
- Visualized term frequency and category trends using Matplotlib and Seaborn for actionable health data insights.

## Education

---

**Bachelor of Technology, Computer Science**  
Galgotias University

7.6 CGPA

**Senior Secondary School**  
Delhi Public School, Aligarh

75%

## Certificates / Achievements

---

- SIH2025 - Prequalifiers 1<sup>st</sup> RunnerUP
- Participated in ICPC2024
- Dexterix 4.0 - Finals - Rank 19
- 1632 Rated on Leetcode
- 900 Rated on CodeForces
